CAREER OBJECTIVE

Enthusiastic and detailed oriented Computer Applications Graduate with a strong foundation in Python, AI, Web Development, IoT, and Embedded Systems. Hands-on experience through internships and technical projects, with strong problem-solving, teamwork, and leadership skills.

TECHNICAL SKILLS

Programming Languages: Python | Java | C | C++

Web Technologies: HTML5 | CSS3 | JavaScript

Frameworks & Libraries: React.js (Learning) | Node.js (Learning) | Express.js (Learning)

Full Stack Development: MERN Stack (Learning)

Database: SQL | MySQL

Version Control: Git | GitHub

Cloud & DevOps: AWS (Learning) | Docker (Learning) | Kubernetes (Learning) | DevOps (Learning)

Software Development: Object-Oriented Programming (OOP) | Data Structures & Algorithms |

REST APIs | Software Development Life Cycle (SDLC) | Database Management Systems (DBMS)

IoT & Embedded Systems: NodeMCU (ESP8266) | Arduino IDE | Embedded Systems | IoT Development

Operating Systems: Linux | Windows

Networking: Computer Networks | TCP/IP

Tools: Visual Studio Code | Eclipse IDE | Microsoft Office Suite Programming Languages

EDUCATION

Bachelor of Computer Applications (BCA)

2023– 2026

St. Joseph's College for Women, Tirupur (Bharathiar University)

CORE COMPETENCIES

- IoT & Embedded Systems
- Software Testing & Debugging
- Analytical Thinking
- Team Collaboration
- Communication Skills
- Time Management
- Adaptability & Continuous Learning

INTERNSHIP & TRAINING

NOBLE SOFTWARE SOLUTIONS, Tirupur | Full Stack Development Trainee

May 2026 – Present

- Currently undergoing an intensive Full Stack Development training program at Noble Software Solutions, Tirupur.
- Gaining hands-on experience in HTML, CSS, JavaScript, React.js, Node.js, Express.js, MySQL, JSON, REST APIs, Git, and modern web application development.
- Learning front-end and back-end development, database management, API integration, web application deployment, and full-stack project development using industry-standard tools and best practices.
- Developing responsive, scalable, and database-driven web applications through real-world projects.

ATS Techno soft, Coimbatore | Course: AI with Python

May 2025 – June 2025

- Completed intensive training in Artificial Intelligence using Python with practical exposure to core AI concepts and programming fundamentals.
- Gained hands-on experience in developing AI-based solutions through structured, project-oriented learning.
- Strengthened logical thinking, analytical skills, and problem-solving abilities by working on real-time use cases and coding exercises.
- Improved understanding of Python programming and its application in building intelligent systems.

PROJECTS

Project Number: 01

Title: ELITE EXHAUST CARE- LPG Leakage and Smoke Detection Safety System

DEC 2025 – FEB 2026

Project Brief

Designed and developed an IoT-based Smart Kitchen Safety Monitoring System to enhance household safety by continuously monitoring hazardous conditions such as LPG gas leakage, fire, smoke, and abnormal temperature levels. The system utilizes embedded sensors to detect potential hazards and immediately alerts users through a buzzer and cloud-based notifications. Real-time sensor data is transmitted via Wi-Fi for remote monitoring, enabling quick response to emergency situations and reducing the risk of accidents.

Technologies Used

ESP3266 | Embedded C | Micro Python | MQ-2 Gas Sensor | Flame Sensor | Temperature Sensor | Buzzer | Wi-Fi, Blynk | Firebase | Arduino IDE.

Key Challenges & Learnings

- ✓ Successfully interfaced multiple safety sensors to monitor gas leakage, fire, and temperature in real time.
- ✓ Implemented Wi-Fi-based IoT connectivity for remote monitoring and instant emergency notifications.
- ✓ Calibrated sensor thresholds to reduce false alarms while ensuring reliable hazard detection.
- ✓ Gained practical experience in embedded firmware development, sensor interfacing, IoT communication, and real-time safety monitoring systems.

[GitHub Profile](#) | [LinkedIn Profile](#) | [Website](#)

- ✓ Enhanced debugging and hardware integration skills by combining multiple sensors and alert mechanisms into a single embedded solution.

Project Number: 2

Title: CRM Jewel Management System

JUNE 2025 – OCT 2025

Project Brief

Developed a Customer Relationship Management (CRM) application using the Salesforce platform to efficiently manage customer information and sales records. Designed reports and dashboards to provide business insights and improve customer relationship management through organized data handling and reporting.

Technologies Used

Salesforce CRM | Reports & Dashboards | Data Management

Key Challenges & Learnings

- ✓ Developed a CRM application to manage customer and sales information efficiently.
- ✓ Created reports and dashboards for business analysis and data visualization.
- ✓ Improved understanding of Salesforce CRM concepts and customer relationship management.

LANGUAGES

- English
- Tamil
- Hindi (Speaking)
- Urdu (Speaking)

ADDITIONAL ACHIEVEMENTS

- Authored and presented a research paper titled “How APIs Work in Today’s World” at the 2nd International Conference on Recent Trends in Multi-Disciplinary Research and Innovation (ICRTMRI’25), held at A.V.P. College of Arts and Science, Tirupur.
- The paper focused on API functionality, request-response mechanisms, API integration, data exchange, and real-world applications in modern software development. The presentation demonstrated strong research, technical writing, analytical, communication, and technical presentation skills.
